-  Civil use

INSTALLATION AND USE

VSP is a versatile pumping unit designed for various applications. It's ideal for residential and commercial use, providing water supply and pressure boosting.

VSP seamlessly integrates with any pressurization system, including existing ones, ensuring maximum comfort and enabling significant energy savings.

PRODUCT DESCRIPTION

VSP is a system comprising a pump and an integrated frequency converter. Equipped with a pressure sensor, it ensures a constant pressure as the system's water demand fluctuates.

This ready-to-use product eliminates the need for configuration procedures. Users can adjust the working pressure and view operating parameters and alarm messages via the user interface.

For advanced users, the system offers access to an advanced menu for modifying factory parameters through a guided procedure, allowing adaptation to specific plant conditions.

VSP is an intelligent pumping unit, equipped with:

- ✧ **display and keypad** allowing simple and intuitive configuration and reading of operating parameters;
- ✧ interface ports for additional **analogue** and **digital** input and output **signals**;
- ✧ **PFC technology** maintains hydraulic performance unaffected even when supply voltages vary within $\pm 20\%$ of the nominal value;
- ✧ **RS 485 communication** for connection to a second device in parallel.

Integrated protection against:

- ✧ dry running
- ✧ overcurrent
- ✧ overvoltage and undervoltage
- ✧ combustion chamber
- ✧ short circuit
- ✧ lack of phases in the connections (for three-phase version)

TECHNICAL DATA

- Power supply:
 - **1~ 230V $\pm 10\%$ or 3~ 400V $\pm 10\%$**
 - Frequency: **50/60 Hz**
- Please refer to the technical data of the specific electro-pumps for liquid temperature, ambient temperature, and protection degree.

KEY FEATURES

- ✧ Easy installation, configuration, and adjustment.
- ✧ Greater comfort, thanks to optimized performance and low noise levels.
- ✧ Energy saving reduces startup and operating currents, ensuring.
- ✧ Automatic compensation for fluctuations in the supply voltage.
- ✧ Communication with another device to enhance system capabilities.
- ✧ Intelligent management of control and intervention in case of anomalies.

USER INTERFACE

It enables access to configuration menus, navigation through settings, adjustment of operating parameters, and activation or deactivation of the pumping unit.

1. Scroll arrow keys (▼) (▲)
2. ESC menu exit key (ESC)
3. ON/OFF button (⏻)
4. Confirmation button OK (OK)
5. 4-backlit display to indicate the operating status of the VSP

**WHITE display
EXPECTATION**

**Display VERDE
START**

**RED display
ERROR**

**YELLOW display
(MENU OF
PROGRAMMING)**

DISPLAY SYMBOLS

6. ALARM warning light !
7. AUTOMATIC operation indicator light (A)
8. MANUAL operation indicator light (M)
9. Indicator light for running pump no. 1 (1)
10. Indicator light for running pump no. 2 (2) (if present)
11. Wi-Fi active indicator light (Wi-Fi symbol) (if present)
12. Alphanumeric display with 2 lines for visualization of: voltage, frequency, current, power factor (cosφ), pressure, level, system operating status, system anomalies.
13. VSP operating status LED lights
